

S. Bi. Automations

Industrial Automation Projects

TECHNICAL SUPPORT

We provide you with on-site service and technical support for all types of production machines, automation and electrification systems of all manufacturers. We provide maintenance and technical support contracts, as well as Telephone Support for full 24/7 technical assistance.

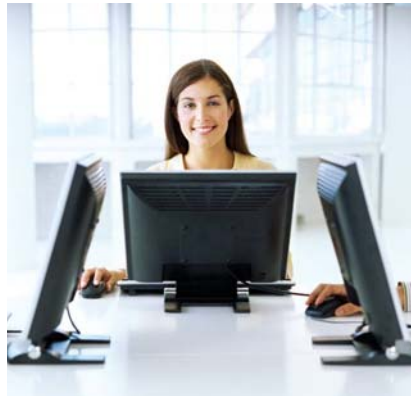

REDUCE LOSSES

Reduce losses in manufacturing processes with our prompt assistance and support all around Greece.

GUARANTEE

Our pleased clients, our long time experience, and know-how is the best guarantee, ensuring high quality service delivery. We have invested in authentic equipment and software provided by major automation system manufacturers, enabling us to be connected almost anywhere, being truthful to the promise we have given you.

Service and damage detection 24 hours a day

S.Bi.A specializes in repairing packaging and palletizing machines, as well as PLC automation systems, guaranteeing prompt, reliable and specialized checking, approach and amendment of any kind of damage you may confront. Our clients have been enjoying our services for the last three years all over Greece, so S.Bi.A technicians are bound to arrive at your industry premises faster than any other technician.

Our high quality work and fast service are unique qualities reflected in all our corporate relationships, contributing to reduction of "dead" manufacturing time, as well as possible expenses induced by stoppage in production process. With us you can always be certain for the non-stop operation of your machinery.

General examination of manufacture machinery

S.Bi.A undertakes precautionary examination and technical analysis of packaging and palletizing machinery as well as automation systems, records and analyzes all data and composes a full report concerning the condition of your machinery.
